User Story

Introduction

User journey and story mapping is a useful tool for planning releases based on how your users will interact with each iteration. Our user story map template can help you plan and prioritize your work based on where it will create the most value for your users.

1-2 hours

DIFFICULTY Intermediate

Agenda

- 1 Create or share your personas
- Build the Customer Experience
- Build and update the backlog

How to use this template

Make plans and put them into action in Jira:

Process outputs from prioritization and planning sessions quickly and efficiently by exporting sticky notes from your mural directly

Click here to learn more into Jira.

- → Import tasks and isssues into MURAL from Jira To import issues into a mural to plan and prioritize, simply right click on the canvas and choose "import Jira Issues."
- ← Export tasks from MURAL to Jira After your session in MURAL, right click on a sticky note (or select multiple sticky notes) and choose "send to Jira."

Build your maps at the speed of thought:

Switch between different shapes and sticky notes from the formatting toolbar.
